

# CCBE Safety Council Breakfast Meeting

**Tues, July 14, 2009**  
7:15 am—8:30 am

A Full Breakfast is Included

**Piccadilly Inn**  
(Shaw / Van Ness)  
Regency Room B & C  
2305 W. Shaw Ave.  
Fresno, CA

## RSVP to . . .

559.237.1831 or email  
Nicolette@cencalbx.com

Building a Safer Industry Today.

## Topic . . Ladder Safety: Are You Sure You Know it All?

Please join us for a fun-filled action packed presentation on ladder safety with a different perspective. The session will discuss safe ladder design, uses and misuses, identification of ladder safety issues, and economic considerations with regard to ladder use. Ladder safety is taken for granted yet injury rates and costs associated with ladder misuse are amongst the highest: find out why and learn how to ensure safe, efficient ladder use.

Are job made ladders OK per Cal/OSHA and what makes them safe?

What are the safe and proper uses for ladders?

When is a ladder appropriate for the job and when is it not?

What is a safe ladder and how can you tell?

When and how to get rid of a ladder, or, can you repair it?

### Guest Speaker: Eric Andersen

Eric has a diverse background in the field of environmental, health and safety. He is currently an EHS Professional with Boretti, Inc. and a Member of the American Society of Safety Engineers (ASSE), Central Valley Chapter. Eric's safety experience includes manufacturing, industrial and construction environments. He is an IVES Certified Master Instructor and an authorized OSHA Construction 10- and 30-hour Instructor.
