OSHA Inspections: What To Look For

You know how to prepare for an OSHA inspection and maybe even how to conduct one; however, do you know specifics as to what OSHA looks for? This session will take the unusual tact of providing attendees with a “show and tell” approach focusing on the most common OSHA citations using photos of violation/non-violation situations so you can apply what you’ve learned in your workplace.

- Top 10 OSHA Citations
- Review and discussion of each OSHA regulation subject to the top 10
- How to identify what is in compliance and what is not, using photographic examples
- Methods to resolve citable issues

SPEAKER: James Boretti, CSP, President, Boretti Incorporated
DATE: Tuesday, March 30, 2010
TIME: 12:00pm - 1:30pm (Lunch Included)
Please consider joining us for a Roundtable discussion directly following the presentation.
