Confined Space Training

Don't Risk Your Workers Lives—Send them to this Training

Building a Safer Industry Today, One Member at a Time!

Every employee working in and around a confined space needs to understand the hazards that may be found inside. A confined space is defined as an area that is big enough to permit a person to enter, has limited means of entrance and exit and is not designed for human occupancy.

TOPICS TO BE COVERED:

- The Nature of and Hazards of Confined Spaces
- Regulatory Requirements for Confined Spaces
- The Authorized Entrant's Duties
- The Attendant's Duties
- The Entry Supervisor's Duties

Don't get left out! While other resources are going to ineffective, cheap, non-interactive training online, the Central California Builders Exchange offers our members a **cost effective, interactive** safety credentialing program that works for your business, builds empowerment and gets results.

After Training Support ~ Our instructors are available for phone assistance after you take the class, with no additional cost. A safety expert at your fingertips: that's value for education brought to you by the CCBE.

Presented by: Boretti, Inc.

Instructor: ERIC ANDERSON

Eric has a diverse background in the field of environmental, health and safety. Eric has been responsible for the development, implementation, and management of safety programs, policies, and procedures to ensure the company complies with all federal, state and local safety laws. This required Eric to become familiar with all aspects company's concepts, practices, and procedures to achieve their safety goals. Eric is a certified IVES Master trainer, allowing him to provide safety certification training for most pieces of equipment, and an Authorized OSHA Instructor for Construction.
